**Professional Reference for Semir Ibrahim
Senior Software Developer**

office@diagsol.co.uk
www.diagsol.co.uk

02/04/2020

To whom it may concern,

Sadly, as a result of unexpected parent company budget cuts, Diagnostic Solutions Ltd had to terminate Semir Ibrahim from his role as a Senior Software Developer effective 30th April 2020. Semir was a respected and professional member of the coding team, and his termination was entirely as a result of corporate cuts/ shutdown of the Stockport office, and in no way a reflection of his exceptional performance within the role.

Semir worked for DSL for a total of 17 months and his attendance, attitude and work ethic were exemplary throughout his employment. He is one of those special developers, willing to take on any coding challenge even if it involved an element of study and research (which he often completed in the evenings and at weekends).

Semir has a very good working knowledge and coding experience in the following areas: VS 2019, C#. .NET 4.6 / Core 3.1, ASP.NET MVC Core and Linux embedded code environments and Automation protocol/ PLC interface. He has also worked integrating data from virtual Factory IO environments into our product.

For any further queries, please contact Tom Scott (Managing Director) Diagnostic Solutions Ltd. 07768592321 or tscott@diagsol.co.uk.

Yours faithfully,

Signed:
